

# PSO Management Console (1.0.0)

---

Allows you to manage your PSO server with a text based GUI -

Official support sites: [Official Sourceforge Repo](#) - [Official Forum](#)

---

Edit “pmc” and change the settings at the top if your PSO server is not in /home/psowner/PSOBBS\_PC.

You will need to run cpan and install these modules:

- cpan -i UI::Dialog
- cpan -i Term::ReadKey
- cpan -i Term::ANSIScreen

You also need to have my PSO Startup Script installed.

Then put this folder in your path so that you can run “pmc” from the command line.
